SUMMARY

Backend Developer with hands-on internship experience in NestJS and AWS-based application debugging, along with strong project experience in Java Spring Boot. Experienced in building and debugging REST APIs, resolving real-world production issues related to CORS, SSL configuration, environment variables, DynamoDB, and AWS Lambda integrations. Skilled in structured logging, payload validation, Git conflict resolution, and release branch contributions. Solid foundation in backend architecture, database-driven systems, and scalable API development.

SKILLS

Frameworks: Spring Boot, Spring Security, Data JPA, Thyme leaf, JSP, Nest JS, Bootstrap

Core Skills: REST API, Microservices, Version Control, OOP, API Integration, Unit Testing

Programming & Querying: Java, JavaScript, HTML, CSS, SQL, MSSQL

DevOps/Deployment: Docker, AWS, Render, Heroku, Azure

Databases: MySQL, PostgreSQL, DynamoDB

AI/ML: Spring AI, Google Gemini 2.0 Flash, OpenAI, Llama 3

Tools: Git, GitHub, IntelliJ, Eclipse, VS Code, MySQL Workbench

EXPERIENCE

Backend Developer Intern (Remote) – PearlThoughts Pvt. Ltd., Remote, India

November 2025 – December 2025

Project: Schedula – Appointment Management System | **Tools:** NestJS, AWS (Lambda, DynamoDB), AWS CLI, Git

- Contributed to backend development of a production-grade appointment scheduling platform using NestJS.
- Resolved CORS, SSL, and redirection issues between frontend and backend services running on different ports.
- Integrated AWS Lambda with DynamoDB; debugged payload validation failures caused by empty strings and incorrect template mappings.
- Implemented structured logging to trace environment variables, session data, and method-level parameters.
- Debugged WhatsApp notification workflows by validating event payload sequences and fixing Meta API rule violations.
- Resolved Git cherry-pick conflicts and raised pull requests against the release branch.

PROJECTS

Smart AI Assistant Tools – AI Chat Platform | Java, Spring Boot, Thymeleaf, Microsoft AI Foundry

- Developed a full-stack AI chat platform integrating Microsoft AI Foundry for real-time text generation, translation, voice-to-text, and OCR.
- Engineered Spring Boot backend and Thymeleaf frontend for dynamic AI interaction workflows with prompt-based processing.

SpringBootBackend – REST API Services | Java, Spring Boot

- Built RESTful backend services with layered Controller-Service-Repository architecture and clean API design principles.
- Implemented structured REST endpoints supporting full CRUD operations with Spring Data JPA and MySQL.

AWARDS & CERTIFICATIONS

- Career Essentials in GitHub Professional Certificate – GitHub (LinkedIn, Jan 2026)
- Practical GitHub Code Search Certificate – LinkedIn (Jan 2026)
- MySQL Certificate – HackerRank
- Python Certificate – Udemy
- JavaScript & jQuery Certificate – Udemy

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering (AI & Data Science)

Khwaja Moinuddin Chishti Language University, Lucknow – Aug 2022 – Jun 2025 | CGPA: 8.18

Diploma in Computer Science & Engineering

Board of Technical Education, Lucknow – Jul 2019 – Jun 2022 | 78.89% | Ranked in Top 10 of Class
